JORDAN'S PRINCIPLE
SELECT: MUSTIMUHW cEMR

Jordan's Principle teams play a key role for our families and children. It is important that these teams are equiped with the right tools to support their important work. **The Mustimuhw Community Electronic Medical Record (cEMR) system is positioned as the best tool for your Jordan's Principle Program.**

Mustimuhw cEMR – A Foundational Tool

Many Jordan's Principle teams in have sought to use the Mustimuhw cEMR as their Jordan's Principle database and documentation tool. Benefiting from two decades of continuous input from First Nations teams, the cEMR has powerful functionality for all health & wellness teams, thus removing the need for separate systems for each program or department and improving communication, information sharing and collaboration across teams. We welcome any organization that is interested in leveraging the cEMR to support their data management needs.

Privacy & Security, Data Governance, OCAP

We take the privacy & security of your data very seriously. The Mustimuhw cEMR is the only Jordan's Principle software with national certification for health information privacy and security. The cEMR is OCAP-aligned, supporting Nation-based Data Governance, meaning YOU own your own data, and YOU get to decide who can view & access it.

Jordan's Principle Workflow

The cEMR is designed to support the Jordan's Principle workflow, including: charting and documentation capabilities, form templates, reports, referral and task management, and capturing group activities / events. Built to support quality case management, service delivery and advocacy for children and families.
** See below: *Key Features & Functions* **

Book A Demo

KEY BENEFITS
