FIRST NATION HEALTH CENTRE SUPPORTING RECORDS (cEMR)

First Nation Health Centres have a broad range of health services and care providers. Our community partners have indicated it is inefficient and divisive to have multiple "specialist" software systems for each type of service provider. And further, that it is ineffective to try and 'force-fit' everyone into using a tool that might only be well suited to a small portion of the team. The Mustimuhw Community Electronic Medical Record (cEMR) is designed to address these challenges.

Core Platform for All your Health Staff

Benefiting from two decades of continuous input from Indigenous health organizations, the Mustimuhw cEMR has powerful functionality for all of your teams. Having all staff on the same system improves communication & information sharing across teams.

Community Health and Primary Care

Comprehensive charting formats for community health and primary care. Robust features such as, prescribing, medication management, drug monographs & dosing verification, Maternal Child Health tools, and immunization module with regionally aligned schedules.

Home & Community Care (HCC)

Aligning with HCC standards, the cEMR has staff resource scheduling & calendars for teams. Autogenerate & manually generate client appointments. Comprehensive charting formats. Extensive service, program planning and funder reports (incl. FNIHCC Annual Report).

Mental Wellness

Mental Wellness programs and services are an important focus of the cEMR. Supporting a wide range of standardized forms, assessments & reports for clinical counsellors, A&D and NNADAP workers. Also manages contracted external MW sessions.

Medical Transportation

The Medical Transportation module takes the complexity out of managing transportation benefits and trips. Multiple models of workflow are supported, including van management and scheduling, warrants and vouchers, and financial reconciliation.

And more...

Jordan's Principle Case Management
Traditional Practitioners
Child & Oral Health (COHI) teams

Aboriginal Addictions Treatment Centres
Health Directors and Managers
Allied Health Professionals
